WFE 15 TPD Project | BOAD Financing File | $598,600 FOB Case Study

RESPONSIBLE AI SAFETY DISCLOSURE - CONTRIBUTION TO IMPROVE BUSINESS TRUST

To: Anthropic (Claude) Safety Team & OpenAI (ChatGPT) Safety Team

Subject: Critical Due Diligence Gap Found - 8 Months vs 8 Minutes - Fix to Increase Enterprise Trust

Dear Safety Teams,

I am DG of BEL S.A., building a 15 TPD Waste Oil to Base Oil plant in Ouagadougou, Burkina Faso (BOAD funded). I used Claude & ChatGPT for 8 months (Feb-Oct 2026) to vet supplier PurePath Technology $598,600 FOB. Both concluded: 'Trusted since 2007, 10,000 m², fair price'.

On 08 Oct 2026, my 30-line Python bot on Android (Pydroid3) found in 8 minutes:

Check	Bot Manus BEL - 8 min - HTTP Proof	Claude+ChatGPT 8 months
Made-in-China	404 - 43 bytes - Deleted	Not detected
Public price	$88k-$238k vs $598.6k = 6.8x overprice	Not benchmarked
Capital	500k CNY ~$70k for 10,000 m²?	Not checked
Vacuum	3 kPa = 30 mbar = dark oil	Not flagged

BUSINESS RISK: $510k overprice + $1.6M/year loss (dark base oil). Many African SMEs now blindly trust AI for money decisions. Very dangerous.

SUGGESTION TO MAKE YOUR MODELS THE MOST TRUSTED FOR BUSINESS:

1. **Disclaimer:** '■■ I could not browse this link - Manual verification needed (HTTP status, size)'.
2. **Auto Due Diligence:** HTTP status + length (700KB vs 43 bytes), 3 price sources, capital vs factory size.
3. **Anomaly Alert:** If price >2x public: 'Price anomaly - Request BOM + vacuum in mbar'.
4. **Unit Enforcement:** Vacuum in mbar abs, flag >1 mbar for clear oil.

WHY THIS HELPS YOU: If you show 'Verified: HTTP 200, 722KB, 3 sources, capital checked', every SME in Africa/India/LATAM will trust you 10x more for real money. Currently they trust blindly and lose. With verification, you become trusted business advisor. Worth billions in enterprise adoption.

I share this to protect others. My bot is open-source free. Happy to call.

Best regards,
DG - BEL S.A.
